## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance.

The limitation which is primarily responsible for distinguishing the claims of this application over the prior art is the limitation concerning the antenna formed by an electrically conductive inner surface of an antenna airbag as recited in independent claim 1, the only independent claim of this application. Motivation for combining this limitation with the other recited limitations was not found in the prior art

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The closest antenna airbag art is defined by such patents as Saitou et al.(6,559,555) and Breed et al.(RE37,736). Kaiker et al.(6,273,461) discloses conductive airbag inner membrane surfaces, but these surfaces do not function as antennas.
